AP-D33/C
AP-Q55/C

1. MODEL AP-D33/C

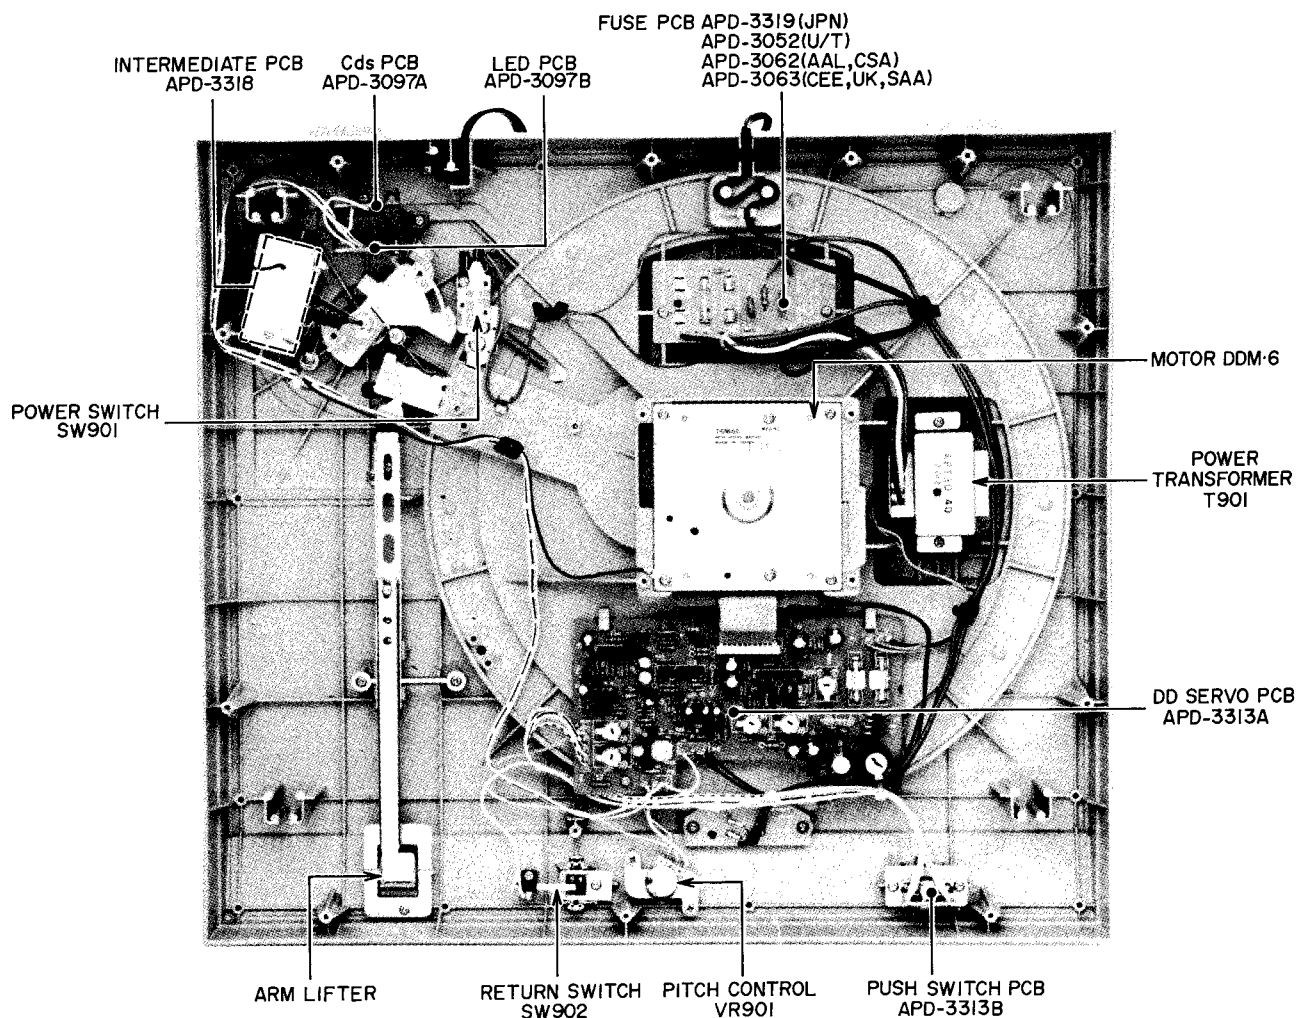

Fig. 3 Bottom View (Model AP-D33/C)

2. MODEL AP-Q55/C

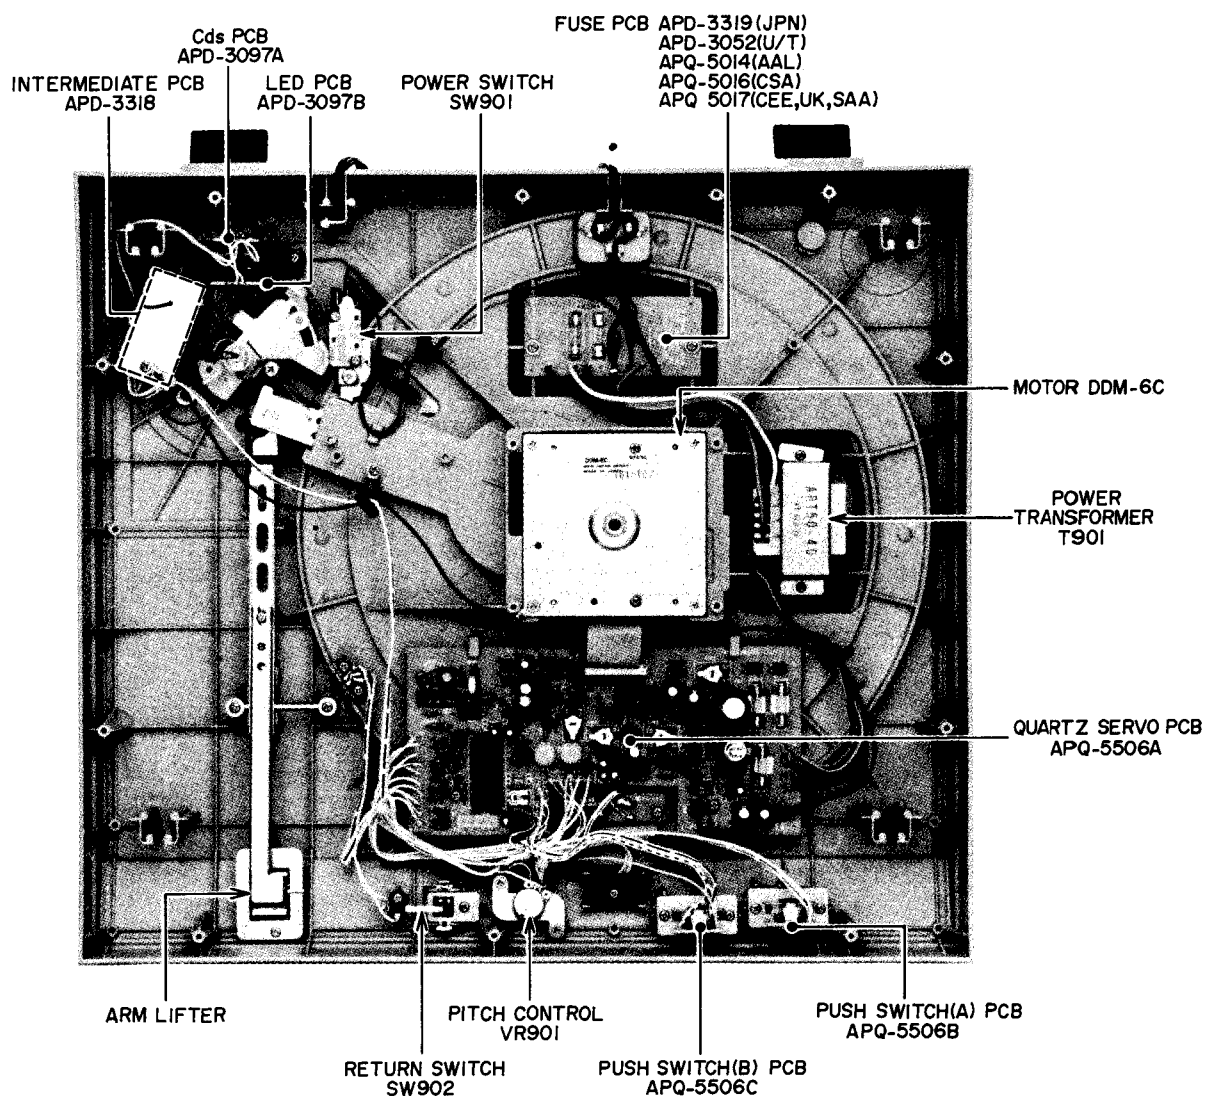

Fig. 4 Bottom View (Model AP-Q55 /C)

Fig. 5 Voltage Conversion (U/T Model only)

1. VOLTAGE CONVERSION

Models for JPN, Canada, USA, Australia and Europe are not equipped with this facility. This machine can be set to 110–120V/220–240V as required.

Each machine is preset at the factory according to destination but if voltage change is necessary it can be accomplished as follows only by qualified personnel.

- 1) Disconnect power supply cord.
- 2) Remove the bottom cover.
- 3) Remove existing Line Voltage Fuse and insert required Line Voltage Fuse in the proper fuse holder according to the printed instructions.

2. CYCLE CONVERSION

With DC servo motor, cycle conversion is not necessary.

VI. MECHANICAL ADJUSTMENTS

1. STYLUS PRESSURE ADJUSTMENT

Fig. 6 Stylus Pressure Adjustment

- 1) Disconnect the Power Cord.
- 2) Set the Cueing Lever to \blacktriangledown .
- 3) Bring the Tone Arm to a position between the turntable and the Tone Arm Rest without touching either.
- 4) Rotate Main Weight backwards and forwards until the Tone Arm is in perfect horizontal balance. (Zero balance is attained.)

CAUTION: 1. Be sure that Anti-skating Adjuster is set to zero.

2. Remove the stylus guard and be careful not to damage the stylus.

- 5) Without moving the Main Weight, turn only the Stylus Pressure Scale Ring to match the "0" mark with the marker on the weight shaft. (Refer to Fig. 6.)

- 6) Turn Main Weight counter-clockwise (as viewed from the front) with the Stylus Pressure Scale Ring until the marker on the weight shaft corresponds to the desired stylus pressure on the scale.

NOTES: 1. AP-D33, AP-Q55 Black and Silver Panel Models do not come equipped with Cartridges.

2. The recommended stylus pressure for the supplied stylus (AP-D33C, AP-Q55C only), RS-90 is 2 grams. However, in the case of outside interference, more pressure may be needed for stability. The range of adjustment is from 0 to 3 grams.

- 7) Set the Anti-skating adjuster to correspond with the stylus pressure. (Fine adjust if necessary.)

2. OVERHANG ADJUSTMENT

Fig. 7 Overhang Adjustment

The distance from the turntable shaft to the stylus when the Tone Arm is at the center of the turntable is called overhang.

Although overhang is preset at the factory for this model, when the cartridge is replaced, adjustment may be necessary.

For your convenience, the rubber turntable mat has an indicator groove at the center for easy overhang adjustment.

Bring the Tone Arm to the center of the turntable. Adjust the cartridge position in the cartridge shell so that the stylus position is even with the middle groove ring at overhang adjustment position. The cartridge position is adjustable by resetting the screws of the cartridge shell.

3. AUTO-RETURN ADJUSTMENT

Fig. 8 Auto-Return Adjustment

- 1) Leave the Power Cord connected for easy conformation of adjustment, and return the Tone Arm to Tone Arm Rest.
- 2) Remove the Aut-return Adjustment Screw cap.
- 3) Adjust the Auto-return Adjustment Screw.
- 4) Put the Tone Arm just over the Groove for Auto-return Adjustment in the rubber mat.
- 5) Listen for a clicking which indicates that the auto-

return adjustment is successful.

If no clicking is heard, repeat the procedure until it is.

- * Turning the screw 90° clockwise moves the position of Stylus approx. 4.5 mm towards the Spindle. Turning 90° counterclockwise moves the position of Stylus approx. 4.5 mm away from the Spindle.

4. ARM LIFTER ADJUSTMENT

Fig. 9

Fig. 10

Fig. 11

Fig. 12

- 1) Adjust with the elevation control and the arm lifter should be down. Confirm that the elevation shaft and lifter lever are touching. If not, press the arm lifter down with one finger until they do. Adjust screw (a) at exactly the point where the gap A between the elevation lever (B) and the elevation control disappears. (Refer to Fig. 9.)
- 2) Next operate the auto return (turn the main gear by hand) and raise the arm lifter. With the eleva-

- tion control at ▼, adjust screw (b) at exactly the point where the gap (B) between the shaft pin and the elevation lever (A) disappears. (Refer to Fig. 10.)
- 3) Put a record on and set the elevation control to ▼. Adjust screw (a) until there is an 8 mm gap between the tip of the stylus and the surface of the record. (Refer to Figs. 11, 12.)

5. RETURN PLUNGER INSTALLATION POSITION ADJUSTMENT

Fig. 13

Press the Reject Lever with your finger until the Reject Plate touches the Spindle Gear when the motor is attached as shown in the illustration. At this time, adjust the position of the Plunger so that the Gap A between the Reject Lever and Plunger disappears.

After adjustment, confirm that the Auto Return operates.

Resistor and Capacitor which is not listed in this parts list, please refer to COMMON LIST FOR SERVICE PARTS.

HOW TO USE THIS PARTS LIST

1. This parts list is compiled by various individual blocks based on assembly process.
2. When ordering parts, please describe parts number, serial number, and model number in detail.
3. How to read List

FLYWHEEL BLOCK #13

12-115x	800425	Flywheel Block Assy. Comp.	RDG #13	1
12-116	244506	Flywheel Only	RD-233	1
12-117x	244754	Felt, Flywheel	RD-275	1
12-118	251324	Main Metal Case	RD-236	1
12-119	253080	Main Metal	RD-237	1

4. The symbol numbers shown on the P.C. Board list can be matched with the Composite Views of Components of the Schematic Diagram or Service Manual.
5. Please utilize separate "Common List for Service Parts" for Resistor Parts orders.
6. The shape of the parts and parts name, etc. can be confirmed by comparing them with the parts shown on the Electrical Parts Table of P.C. Board.
7. Both the kind of part and installation position can be determined by the Parts Number. To determine where a parts number is listed, utilize Parts Index at end of Parts List.
It is necessary first of all to find the Parts Number. This can be accomplished by using the Reference Number listed at right of parts number in the Parts Index. (meaning of ref. no. outlined in Item 3 above).
8. Utilize separate "Price List for Parts" to determine unit price. The most simple method of finding parts Price is to utilize the reference number.

- CAUTION:**
1. When placing an order for parts, be sure to list the parts no., model no., and description. There are instances in which if any of this information is omitted, parts cannot be shipped or the wrong parts will be delivered.
 2. Please be careful not to make a mistake in the parts no. If the parts no. is in error, a part different from the one ordered may be delivered.
 3. Because parts number and parts unit supply in the Preliminary Service Manual (Basic Parts List) may be partially changed, please use this parts list for all future reference.

WARNING: ⚠ INDICATES SAFETY CRITICAL COMPONENTS. FOR CONTINUED SAFETY, REPLACE SAFETY CRITICAL COMPONENTS ONLY WITH MANUFACTURER'S RECOMMENDED PARTS.

AVERTISSEMENT: ⚠ IL INDIQUE LES COMPOSANTS CRITIQUES DE SURETE. POUR MAINTENIR LE DEGRE DE SECURITE DE L'APPAREIL NE REMPLACER LES COMPOSANTS DONT LE FONCTIONNEMENT EST CRITIQUE POUR LA SECURITE QUE PAR DES PIECES RECOMMANDEES PAR LE FABRICANT.
